

# Software QA Tester

Job# QA-1024

## Position Summary

---

Working with 4castplus offers you the opportunity to be part of a dynamic and innovative team delivering market-leading software solutions sold worldwide. We love good ideas, and we love people who offer imaginative solutions. We reward those who get a thrill out of taking on challenges by using creative and independent-thinking approaches.

We are looking for a Software QA Tester. As the successful candidate you will work collaboratively with our project management and technical teams to help design and maintain the quality of our cloud-based and mobile applications by ensuring user requirements have been tested, and defects have been recognized and resolved.

We are a very results-based organization that takes a very balanced approach to the management of its staff. How you get your work done is up to you – as long as the results are clear and meaningful. So, if you're passionate about software testing, and you're looking for an exciting and challenging opportunity in a high-tech company, then this is a great opportunity for you.

## Detail Role Definition

---

If the following characteristics sound like you, we would love to hear from you:

- Critical thinking and problem solving; demonstrating the ability to apply yourself to day-to-day tasks and decisions
- Keen attention to detail. Must be deadline and results-oriented.
- Ability to partner with cross-functional teams to enhance quality and process standards to ensure on-time, efficient and high-quality applications are delivered to Production
- "Out-of-the-box" tester who takes pride in quality and multiple approaches towards testing
- Strong familiarity with testing automation tools

## What You'll be Testing

4castplus is world-leading construction project management technology that enables customers to significantly improve their ability to execute successfully and profitably on major projects. It's a multi-user, collaborative solution that brings together powerful tools for planning, management, purchasing, cost tracking, financial controls and reporting. Customers experience intense visibility and control of their projects through an easy-to-use cloud-based platform. Organizations worldwide in key industries have discovered the value 4castplus brings to their business. Visit our website at [www.4castplus.com](http://www.4castplus.com).

## Minimum Qualifications

- Bachelor's degree required: preferably in Computer Science
- 3-5 years solid experience in software testing of web and mobile applications
- High flexibility to perform in an Agile environment with frequent requirement changes driven by customers, and continuous deployment releases to production. Testing activities will include

Smoke Testing, System Testing, System Integration Testing, Regression Testing, UAT Support and Post-production Support.

- Create and execute test cases, scenarios, and procedures to determine product quality, release readiness of web and mobile applications, and compliance with standards and security
- Experience with QA automation tools and strategies
- Knowledge of bug tracking system flow definition, maintenance, and system implementation
- Loyalty and perseverance through long, stable job tenure and positive career trajectory

### These Qualifications Would be a Plus

- Experience in building automated test scripts
- Exposure to any of the following industries: Construction, Infrastructure, Oil & Gas, Mining
- Exposure to any of the following disciplines: Accounting, Project Management, Project Controls, Procurement, Construction Management, Document Controls

### About Jetsoft Group – Makers of 4castplus

Jetsoft Group is an innovative technology company that understands that software should be easy to use and rich in functionality that simplifies the complexities of construction projects. Organizations around the world rely on 4castplus to help them move from difficult, spreadsheet-based management of major projects, into an organized and robust software solution targeted at keeping their projects on budget, on schedule and under control. We strongly believe in an ethical approach to business that is respectful of all people, the environment and our communities. We are dedicated to delivering technology that enables organizations to unleash their innovative potential and to become more profitable, successful, and happy doing what they do.
