

Software Developer

Job# SD-1024

Position Summary

Working with 4castplus offers you the opportunity to be part of a dynamic and innovative team delivering market-leading software solutions sold worldwide. We love good ideas, and we love people who offer imaginative solutions. We reward those who get a thrill out of taking on challenges by using creative and independent-thinking approaches.

We are looking for an Intermediate/Senior Software Developer. As the successful candidate you will work collaboratively with our project management and technical teams to help design, develop and maintain the 4castplus cloud-based and mobile applications, along with system integration solutions.

You'll be working with tools such as .NET, SQL Server, Javascript, along with various other supporting applications for building and releasing a large cloud-based product.

The development team works in an agile, collaborative development process that is tightly integrated with QA and product management for continuous quality and security oversight. You will be given opportunities to work with a range of technical challenges including:

- New feature development
- Existing feature enhancements
- System integrations
- Mobile application development
- Defect and maintenance development

Our team is committed to a very high level of quality and security with our software development as we strive to provide our customers with a high-functioning, easy-to-use solution that helps them achieve their technology objectives. 4castplus is a very comprehensive system with a large feature set and a tremendous amount of data, including critical financial data. Attention to detail is therefore a key attribute for a contributing member of our development team.

We are a very results-based organization that takes a very balanced approach to the management of its staff. How you get your work done is up to you – as long as the results are clear and meaningful. So, if you're passionate about software development, and you're looking for an exciting and challenging opportunity in a high-tech company, then this is a great opportunity for you.

Detail Role Definition

If the following characteristics sound like you, we would love to hear from you:

- Critical thinking and problem solving; demonstrating the ability to apply yourself to day-to-day tasks and decisions
- Keen attention to detail. Must be deadline and results-oriented.

- Ability to partner with cross-functional teams to enhance quality and process standards to ensure on-time, efficient and high-quality applications are delivered to Production
- "Out-of-the-box" developer who takes pride in quality and multiple approaches towards development
- Customer-driven focus as what you're building is mission-critical software for our clients
- Strong experience with web and cloud development, along with mobile app development
- Experience with working with a REST API (or other integration platforms) for system integration development
- Continuous pursuit of excellence in advancing your knowledge, best practices and leading design techniques

What You'll be Developing

4castplus is world-leading construction project management technology that enables customers to significantly improve their ability to execute successfully and profitably on major projects. It's a multi-user, collaborative solution that brings together powerful tools for planning, management, purchasing, cost tracking, financial controls and reporting. Customers experience intense visibility and control of their projects through an easy-to-use cloud-based platform. Organizations worldwide in key industries have discovered the value 4castplus brings to their business. Visit our website at www.4castplus.com.

Minimum Qualifications

- Bachelor's degree required: preferably in Computer Science
- 5+ years solid experience in development of web (cloud) and mobile applications
- High flexibility to perform in an Agile environment with frequent requirement changes driven by customers, and continuous deployment releases to production.
- Familiarity with web technologies including
 - C#
 - SQL (Microsoft SQL Server)
 - JavaScript
 - IIS/ASP.NET MVC
 - XML/HTML/CSS
- Loyalty and perseverance through long, stable job tenure and positive career trajectory

These Qualifications Would be a Plus

- Exposure to any of the following industries: Construction, Infrastructure, Oil & Gas, Mining
- Exposure to any of the following disciplines: Accounting, Project Management, Project Controls, Procurement, Construction Management, Document Controls
- Exposure to enterprise integrations with systems such as: Primavera-P6, SAP, NetSuite, D365, Oracle, Viewpoint, Sage, REST, OData
- SSO, SAML, OAUTH

About Jetsoft Group – Makers of 4castplus

Jetsoft Group is an innovative technology company that understands that software should be easy to use and rich in functionality that simplifies the complexities of construction projects. Organizations around the world rely on 4castplus to help them move from difficult, spreadsheet-based management

of major projects, into an organized and robust software solution targeted at keeping their projects on budget, on schedule and under control. We strongly believe in an ethical approach to business that is respectful of all people, the environment and our communities. We are dedicated to delivering technology that enables organizations to unleash their innovative potential and to become more profitable, successful, and happy doing what they do.
